

the**NightLab**

## Events in the right light

Human perception is eye focussed.

More than 80 % of our information input is optical. Our well beeing is influenced by the optical impressions of our environment. Beautiful impressions lead to positive thoughts.

theNightLab has long-term experience of illuminating very different types of events. We create atmospheres which are unforgettable for your guests.

Projected images and intelligent LED lighting will fascinate your guests and will help them to keep the event in their most precious memories.
